

Supplementary Figure 10. Time-varying effects of endocrine therapy on CIBC risk in patients with DCIS, overall and by race: CRCC, sHR(t), and HR(t) curves.

(a)(d)(g) CRCC for overall patients, White patients, and Black patients, respectively.

(b)(e)(h) sHR(t) curves for overall patients, White patients, and Black patients, respectively.

(c)(f)(i) HR(t) curves for overall patients, White patients, and Black patients, respectively.

Abbreviations: CRCC, cumulative regression coefficient curves; sHR(t), subdistribution hazard ratios; HR(t), cause-specific hazard ratio; DCIS, ductal carcinoma in situ.
