

Supplementary Figure 12. Mortality HR(t) curves for additional risk factors violating the PSH assumption in patients with IDC: age 61-70 and N2.

(a) Mortality HR(t) curves for age 61-70.

(b) Mortality HR(t) curves for N2.

Abbreviations: HR(t), cause-specific hazard ratio; N2, lymph node metastasis stage N2; IDC, invasive ductal carcinoma; PSH, proportional subdistribution hazard.
