Supplementary Figure 18. Confounder-adjusted CIC of CIBC stratified by risk factors with violated PSH assumption in Black patients with IDC.

(a) Confounder-adjusted CIC of CIBC stratified by age groups 61-70 and ≥ 71 years.

(b) Confounder-adjusted CIC of CIBC stratified by N2 and N3 lymph node metastasis status.

(c) Confounder-adjusted CIC of CIBC stratified by tumor size > 5 cm.

Abbreviations: CIC, cumulative incidence curves; CIBC, contralateral invasive breast cancer; IDC, invasive ductal carcinoma.

Note: Reference groups for each panel: age ≤ 50 years, lymph node stage N0, and tumor size ≤ 2 cm, respectively.
